

February 19, 2013

REGULAR SESSION #3

TOWN OF OCEAN CITY, MARYLAND
301 N. BALTIMORE AVENUE, OCEAN CITY, MARYLAND 21842

THE HONORABLE MAYOR AND CITY COUNCIL PRESIDING

MAYOR RICHARD W. MEEHAN

COUNCIL PRESIDENT LLOYD MARTIN
COUNCIL SECRETARY MARY KNIGHT^{ABSENT}

MARGARET PILLAS^{ABSENT}
DOUGLAS CYMEK
BRENT ASHLEY
DENNIS DARE
JOSEPH MITRECIC

ATTENDANCE

Mayor Rick Meehan, Council President Lloyd Martin, Doug Cymek, Brent Ashley, Dennis Dare, Joe Mitrecic, City Manager David Recor, City Solicitor Guy Ayres, Private Events Coordinator Lisa Mitchell, City Clerk Kelly Allmond and Members of the Press and Interested Parties. Council Secretary Mary Knight and Council Members Margaret Pillas were absent.

CALL TO ORDER

Council President Lloyd Martin called this meeting to order at 5:00 p.m. in the Council Chambers of City Hall, 301 North Baltimore Avenue, Ocean City, Maryland 21842; then **Council Member Mitrecic moved to convene into closed session to: (1) consult with counsel to obtain legal advice; and, (2) conduct collective bargaining negotiations or consider matters that relate to the negotiations; seconded by Council Member Dare. The vote was 5-0 with Council Members Knight and Pillas absent.**

Council President Lloyd Martin reopened the meeting at 6:05 p.m. and reported that legal and collective bargaining matters were discussed in the closed session. Persons present were Mayor Rick Meehan, Council President Lloyd Martin, Doug Cymek, Brent Ashley, Dennis Dare, Joe Mitrecic, City Manager David Recor, City Solicitor Guy Ayres, Human Resource Director Wayne Evans, Captain Mike Colbert and John Gilman and Mark Sloan of Miles and Stockbridge and Executive Office Associate Diana Chavis.

PRAYER AND PLEDGE

Beach Patrol Lieutenant Ward Kovacs led the prayer and Pledge of Allegiance.

REPORT ON CLOSED SESSION - TUESDAY, FEBRUARY 19, 2013 AT 5:00 P.M.

Council President Lloyd Martin reported that legal and collective bargaining matters were discussed in closed session. Persons present were Mayor Rick Meehan, Council President Lloyd Martin, Doug Cymek, Brent Ashley, Dennis Dare, Joe Mitrecic, City Manager David Recor, City Solicitor Guy Ayres, Human Resource Director Wayne Evans, Captain Mike Colbert, John Gilman and Mark Sloan of Miles, Stockbridge and Associates, and Executive Office Associate Diana Chavis.

APPROVAL OF MINUTES

Regular Session #2 dated January 22, 2013 and Work Session dated January 29, 2013 were approved as presented.

COMMENTS FROM THE PUBLIC

- Joe Hall suggested that collective bargaining meetings should be open to the public.
- Al Wendling spoke about alcohol-related deaths related to the number of bars in Town.
- Joe Groves said he has reservations about the new Citizen Comment format.

CONSENT AGENDA

Council Member Mitrecic moved to approve items A and C – J as presented; seconded by Council Member Dare. The vote was unanimous.

- A. Private Event Approval Request for ACS Making Strides Pink Ribbon 5K Walk/Run Saturday, October 19, 2013
- C. Private Event Approval Request for Ride for the Feast – Saturday, May 11, 2013
- D. Private Event Approval Request for Shenanigans’ St. Patrick’s 5K Run – March 16, 2013
- E. 3-Year Private Event Approval Request for Easter Sunday Sunrise Service - April 5, 2015
- F. 3-Year Private Event Approval Request for Good Friday Crosswalk - April 3, 2015
- G. 3-Year Private Event Approval Request for MD International Kite Expo - April 24 – 26, 2015
- H. 3-Year Private Event Approval Request for Ravens’ Roost Parade- May 28 – 31, 2015
- I. 3-Year Private Event Approval Request for St. Patrick’s Day Parade - March 14, 2015
- J. Request Permission to Solicit Bids for Beach Patrol ATV’s

- B. Private Event Approval Request for Beach 5 Sand Soccer Series - June 22 and 23, 2013
Council Member Dennis Dare asked Private Events Coordinator Lisa Mitchell to confirm that all staff concerns were addressed. Lisa advised all concerns were addressed and the Organizer agreed to reduce the playing field from eight (8) to four (4) ocean blocks. **Council Member Dennis Dare moved to approve the event; seconded Council Member Mitrecic. The vote was 5-0 with Council Members Knight and Pillas absent.**

MISCELLENEOUS REPORTS AND PRESENTATIONS

Discussion of Community Cats Coalition by Susan Coleman, Community Cats Coalition (see Attachment A) The Mayor and Council asked City Staff to post this information on the Town’s website.

ITEMS REFERRED TO AND PRESENTATIONS FROM THE CITY MANAGER AND STAFF

- A. City Engineer Bid Award Recommendation for Sunset Room Storm Damage Repairs
Council Member Brent Ashley moved to hire Gillis Gilkerson for the amount of \$69,214.00; seconded by Council Member Doug Cymek. The vote was 5-0 with Council Members Knight and Pillas absent.
- B. City Clerk Request for Approval of Taxi Medallion Transfer
Council Member Joe Mitrecic moved to approve the bulk transfer of 15 fleet medallions from Wayne White of City Cab, Inc. to George Basle of Taxi Taxi, LLC. The vote was 5-0 with Council Members Knight and Pillas absent.

ITEMS REFERRED TO AND PRESENTATIONS FROM THE CITY SOLICITOR

- A. Second Reading – Ordinance 2013-01 to Amend Chapter 30, Entitled Environment (allows a rental license/noise permit resident agent to reside in the State of Maryland within 30 miles of Ocean City)
Council Member Brent Ashley moved to ratify Ordinance 2013-01; seconded by Council Member Mitrecic. The vote was 5-0 with Council Members Knight and Pillas absent.
- B. First Reading – Ordinance 2013-2 to Amend Chapter 39 Entitled Franchises (to change the prohibited vehicle vending area from any area south of 18th Street to any area south of 28th Street) **Council Member**

Dennis Dare moved to approve the First Reading of Ordinance 2013-2 with an amendment to prohibit vending from all areas south of 27th Street and east of Baltimore Avenue; seconded by Council Member Mitrecic. The vote was 4-1 with Council Member Ashley opposed and Council Members Knight and Pillas absent.

Council Member Joe Mitrecic moved to schedule a debarment hearing for JSI Ventures, Inc. who forfeited the vehicle vending franchise; seconded by Council Member Doug Cymek. The vote was 5-0 with Council Members Knight and Pillas absent.

COMMENTS FROM THE CITY MANAGER

City Manager David Recor advised that the following items are scheduled for approval in the February 26, 2013 Work Session:

1. Presentation from Bryan Lilley, Ocean City Air Show LLC, Update on June 2013 OC Air Show Event and a Request to permit the sale of food and beverages on the beach within the OC Air Show Center
2. Presentation from Chris Larmore, Fire Chief, regarding purchase of new Aerial Truck budgeted in the FY13 Apparatus Replacement Schedule
3. Presentation from George Thornes, Transportation Superintendent, regarding solicitation of bids for Transit Advertising
4. Presentation from Hal Adkins, Director of Public Works, and Joe Sobczak, General Services Manager, regarding a recent Wastewater Tractor Bid and Request to Award
5. Presentation and Request for Approval of Planning Commission recommendation(s) by Blaine Smith, Zoning Administrator, and Matt Margotta, AICP, Planning & Community Development Director
6. Zoning Ordinance text amendment to permit Miniature Golf as a Conditional Use in the DMX, Downtown Mixed Use, zoning district
7. Zoning Ordinance text amendment to clarify the calculation of required parking for Mixed Use development
8. Presentation from Martha Bennett, Finance Administrator, regarding Banking Services and Request for Approval to "piggyback" the Anne Arundel County, Maryland, contract
9. Presentation and Request for Approval of FY13 Budget Amendment #1 by Jennie Knapp, Budget Manager
10. Presentation of FY14 General Fund Revenue Projections and discussion of General Fund Budget Parameters by Jennie Knapp, Budget Manager, and David L. Recor, ICMA-CM, City Manager
11. Discussion on city-owned parking lots
12. Bid Opening – Bond Counsel

COMMENTS FROM THE MAYOR AND CITY COUNCIL

- Council Member Dennis Dare advised that, at the request of the Maryland Municipal League, he is participating in a focus group that will address the impact of rising sea levels on building and development in flood prone areas.
- Council Member Brent Ashley asked City Solicitor Guy Ayres if the Open Meetings Act requires that collective bargaining negotiations be closed to the public. City Solicitor Guy Ayres said, "No."

ADJOURN

Council Member Joe Mitrecic moved to adjourn at 6:48 p.m.; seconded by Council Member Dare. The vote was 5-0 with Council Members Knight and Pillas absent.

Minutes prepared by City Clerk Kelly L. Allmond, CMC
Minutes approved by the Mayor and Council on: _____

Certified by: _____
City Clerk, Kelly L. Allmond, CMC

Introduce: Susan Coleman Community Cats Coalition
Jackie Martins Delmarva Cat Connection
Nell Levine Town Cats

We come before this council to present a "Partnership Program" that is designed to address the challenges faced by the town & property owners surrounding the presence of stray & feral cats, while treating the cats in a humane & ethical manner, without the threat of removing them from their neighborhood homes.

Stray and feral cats are the product of human mistreatment- owned cats are too often abandoned and those that are not neutered produce litters of untamable kittens, unaddressed, the process continues and seems unstoppable.

Colony by targeted colony, CCC, DCC and TC is hopeful that one day we will be able to drastically reduce the feral cat population here in Ocean City.

Since 2006, we have developed Community Cat Neighborhood Partnership Program (Cat NiPP), a trap/neuter/return and manage (TNRM) program that contributes to the long-term management of feral cat populations on the Eastern Shore and breaks the cycle of trap and remove. TNRM works because it addresses the root of the problem- the breeding.

Through CatNiPP, the cats are humanely trapped, brought to our spay/neuter clinic where they are neutered, vaccinated and generally examined. They are also eartipped (a portion of their ear is cut) to signal that they have been fixed. After treatment, the cats are then returned to their outdoor home- to live out their days in a managed colony. They no longer reproduce and their nuisance behaviors, like fighting, spraying and yowling are dramatically reduced.

TNRM promotes stabilization of the cats in the neighborhood and allows the cats to be humanely treated. TNRM is the solution that not only helps the cats but also makes residents and neighbors truly feel good about handling the challenge. TNRM also breaks that Vacuum Effect cycle. Since the trapped cats are neutered and then returned to the neighborhood site, new, un-neutered cats are held back and do not enter the territory. The neighborhood that once lived with cats that were breeding and causing problems is now stabilized; the cats are vaccinated and healthier and there are no new litters of kittens to contend with. TNRM provides a truly long-term solution.

This program is providing care for cats that are not good candidates for traditional indoor homes. Their home is where they already live. And CatNiPP is as committed to the management of the cats in their home environment, as we are to treating these cats medically. Each cat that comes through our program is tended by a community caregiver. These caregivers live in the neighborhoods where the cats are and sign an agreement with CatNiPP to provide some basic support to the cats, once they are returned. Many times neighbors find themselves at odds over how they feel about the neighborhood cats and those disputes can easily boil over if parties are not able to calmly and rationally confront the issues together. Part of this colony management commitment means keeping the lines of communication open with neighbors.

Besides providing clinical resources for community cats, CatNipp also:

- Promotes spay/neuter of owned cats to help control cat overpopulation
- Conducts neighborhood meetings on issues facing both human and feline residents
- Provides information on alternatives to abandonment of cats
- Builds rapport with each neighborhood so we can tailor support based on the individual needs of EACH community.

We ask the council to permit the implementation of a Trap-Neuter-Return (TNR) program in The Town of Ocean City, Maryland for the purpose of reducing the population of feral cats, benefiting public health, improving the quality of life for residents, and ensuring the humane treatment of feral cats.

A TNR Program shall be permitted and Caretakers shall be entitled to maintain feral cat colonies in accordance with the terms and conditions of this program.

Trap-Neuter-Return involves trapping all or most of the cats in a colony, getting them neutered and vaccinated, and then returning them to their colony. The returned cats, which are ear tipped to identify them as neutered, are provided regular food and shelter. Colonies are monitored by volunteer caretakers for newcomers. Whenever possible, kittens young enough to be socialized and friendly adults are removed from their feral environment and placed for adoption.

TNR immediately stabilizes the size of the colony if at least 70% of the fertile adults are neutered. Neutering closer to 100 percent will result in a gradual decline of the population over time. In addition, the nuisance behavior often associated with feral cats is dramatically reduced. This includes the noise that comes with fighting and mating activity and the odor of unneutered males spraying to mark their territory. The cats tend to roam less, thus becoming less of a visible presence. They continue to provide natural rodent control, a particularly valuable benefit in many areas of Ocean City.

A coalition of the three local cat rescue groups, Community Cats Coalition, Delmarva Cat Connection and Town Cats, local veterinarians, animal control and individuals will implement this program.

As we already receive a number of calls per week, we will continue to work closely with animal control to answer and investigate any call or complaint allegedly caused by a feral or stray cat or feral cat colony.

We will make reasonable efforts to trap any cats we receive a call about and have all trapped cats sterilized, vaccinated against rabies and eartipped by a licensed veterinarian.

We will keep and maintain vaccination, sterilization, and medical records for all trapped cats and provide animal control with copies of vaccination and sterilization records;

We will provide or arrange for the provision of adequate food and water on a regular basis to colony cats and make reasonable efforts to ensure adequate shelter for colony cats;

Make reasonable efforts to remove and find permanent adoptive homes or foster homes for kittens born to colony cats;

Report annually in writing to animal control on the status of the colony, including:

- Total number of cats in the colony and total number of cats in the colony that are sterilized;
- Number of cats in the colony sterilized and vaccinated pursuant to the TNR Program in the past year;
- Number of cats that have died or otherwise ceased to be part of the colony in the past year;
- Number of kittens born to colony cats in the past year and their disposition; and
- Number of cats and kittens removed for purposes of foster or adoptive placement in the past year.

This Program shall set standards and assign responsibilities for its practice of TNR. This program can promote community involvement in the effort to manage feral cat populations.

**COMMUNITY CATS COALITION
5 Windswept Drive
Berlin, Maryland 21811**

March 26, 2012

Senator Jim Mathias
1523 Teal Drive
Ocean City, Maryland 21842

Dear Senator Mathias:

To help the plight of the many feral/stray cats that call the Eastern Shore their home, we have recognized a need for a centralized contact and information source along the Delmarva Peninsula. Delmarva Cat Connection in alliance with Community Cats Coalition would like to propose a program similar to the Mayor's Alliance for NYC's Animals along the lines of their NYC Feral Cat Initiative to maximize the contribution of dedicated volunteers already giving generously of their time and resources to improve animal lives.

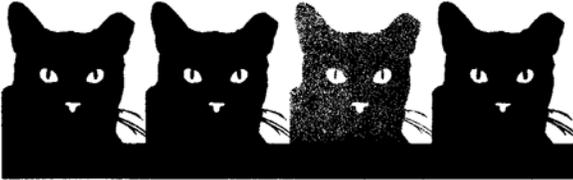

We would like to form an alliance with the Town of Ocean City & Mayor Rick Meeham. The intention of this association would be to create a central resource point for information about medical service providers; help with trapping feral and stray cats, offering low cost spay/neuter clinics in order to prevent more kittens from being born, training workshops to teach the public how to address all aspects of feral cat management.

In NYC, TNR (trap, neuter, return) is the approved method of controlling feral cat populations as prescribed by the office of the Mayor. TNR is the only proven effective method to reduce feral cat populations by attrition, reduce nuisance behaviors surrounding mating and stop reproduction. Extensive literature is available to support these assertions.

Your help in establishing this agency to the benefit of the community, town government and the animals themselves will show a pro-active, humane and progressive approach to animal control of which we can all be proud.

Sincerely,

Susan Coleman
Community Cats Coalition

NYC Feral Cat Initiative

Mayor's Alliance for NYC's Animals® 

What is the New York City Feral Cat Initiative?

The New York City Feral Cat Initiative (NYCFCI) is a program of the Mayor's Alliance for NYC's Animals® — a coalition of more than 150 animal rescue groups and shelters working with Animal Care & Control of NYC (AC&C) to end the killing of healthy and treatable cats and dogs at AC&C shelters.

The NYCFCI's mission is to raise awareness about the thousands of feral and stray cats (which collectively we refer to as community cats) living outdoors throughout NYC's five boroughs, and to offer solutions to prevent the number of homeless cats from increasing and to successfully manage existing colonies.

Our goal is to humanely reduce the number of community cats in NYC and improve the plight of those cats currently living outdoors through the humane, non-lethal method of Trap-Neuter-return (TNR).

Towards this end, we provide advice to the general public and TNR caretakers by phone and e-mail; feline educational information via our website, e-newsletter, and printed materials; community outreach and education, including training workshops in bottle-feeding and taming feral kittens; free equipment loans; transport of traps to and from TNR sites and transport of cats to and from spay/neuter appointments; cat food and straw giveaways; and limited hands-on TNR assistance. We encourage people who feed and care about the cats to learn how to help them by completing a TNR Certification Workshop. In-person workshops are offered on a regular basis in all five boroughs by Neighborhood Cats, and an online certification course is offered by The Humane Society of the United States (HSUS). To date, more than 4,000 individuals have taken these workshops!

What Are Feral Cats and Where Do They Come From?

Tens of thousands of free-roaming cats live in the backyards, alleyways, and outdoor spaces of New York City. They are the offspring of lost or abandoned pet cats and, when unneutered, reproduce prolifically, creating more and more cats. The cats often appear as singles or in pairs, while others live in groups called colonies. Cats living on the street (community cats) fall into two main categories: feral cats and stray cats.

Feral cats have been living with little close human contact for some time, or were born outdoors, and are very wary of people. Ferals originate from domestic cats who have been lost or abandoned and have learned to survive outdoors. Most ferals — certainly adults — are extremely difficult to tame and are unlikely to ever behave like "house cats." Many feral cats are seen after dusk or before dawn, when fewer people are around.

Stray cats are "house cats" who have been lost or abandoned. Having had contact in the past with people, they may meow at you, rub against your leg, and may allow petting, and are more likely than ferals to be out during the day. Usually strays can be successfully adopted back into a home. Although counterintuitive, strays can appear unkempt while ferals who are neutered and fed regularly often look (and are) very healthy.

The terms free-roaming cats and community cats encompass both ferals and strays..

The Solution to the Feral Cat Crisis: Trap-Neuter-Return (TNR)

The NYCFCI supports Trap-Neuter-Return (TNR) as the only humane and proven effective method to control and eventually reduce the stray and feral cat overpopulation crisis. TNR means that the cats are trapped, spayed (females) or neutered (males), vaccinated against rabies, eartipped on the left ear for identification, and returned to their territory where they are provided food and shelter by their caretakers. Young kittens and friendly cats may be taken in for adoption. TNR performed consistently in a targeted neighborhood has the potential to reduce intake at the city's shelters and, consequently, reduce euthanasia rates.

TNR is much more effective and humane than traditional trap-and-kill or trap-and-remove tactics. Both trap-and-kill and trap-and-remove result in the "vacuum effect" — new, unaltered cats move into the emptied area and breed.

TNR, especially mass trapping, immediately stabilizes the colony and reduces tensions in the human community because no new litters are being born and the nuisance behaviors often associated with unaltered cats (spraying, fighting, crying) are dramatically reduced. Additionally, natural rodent control remains in place.

TNR is supported and endorsed by many animal welfare organizations, including but not limited to: The American Society for the Prevention of Cruelty to Animals (ASPCA), Alley Cat Allies, The Humane Society of New York, The Humane Society of the United States (HSUS), The Toby Project, the Mayor's Alliance for NYC's Animals, and Neighborhood Cats.

For more information about TNR and the NYCFCI, please visit our website at www.NYCFeralCat.org or call (212) 330-0033.

Trap Neuter Return of Stray and Feral Cats, The Responsible Solution

Written by Steve Dale

Cook County – which includes Chicago – recently became the latest community to pass an ordinance granting formal for trap, neuter and return (TNR) programs to control stray and feral cats. On October 16, which happens to be National Feral Cat Day, County Commissioners unanimously approved TNR.

Trap, neuter return allows for volunteer caretakers and animal control officers to trap strays and feral cats, spay or neuter, ear notch (a veterinarian notches the tip of an ear for easy identification), vaccinate for rabies, microchip (for specific identification) and the return them to where they were trapped to begin with. Very sick cats are humanely euthanized. Young kitties and friendly once-owned cats are adopted. Caretakers then look after the outdoor cats, offering shelter and food. As any new cat enters the colony, it's quickly spotted

because there's no ear notch. So that cat is trapped, and goes through the same process, including being spayed or neutered

Stray and feral cats are a world wide problem. In the U.S, alone estimates range wildly, from half as many as there are owned cats (there are 88 million owned cats) to twice that number..

Bryan Kortis, a TNR consultant for the Humane Society of the United States and author of "Implementing a Community Trap-Neuter-Return Program" (published by the HSUS, 2007, \$9.99 from www.hsus.org) says, "We know that properly implemented TNR works." His examples range from Newburyport, MA (they went from 300 ferals to six in a dozen years) to New York City, a program which he helped to implement, and says, "From early indications is successful."

Cook County Commissioner Mike Quigley was the bill's original co-sponsor (with Commissioner Joan Murphy), and comments as most citizens might, "I had heard about stray cats and know there is a problem. I relied on what the experts had suggested, and they all said the same thing. Also, I like that TNR will save the county money."

Communities not so enlightened continue to have animal control officers attempt to eradicate stray and feral cats by trapping, and then euthanizing. "It's been the conventional way to do deal with the issue for a very long time," says Cherie Travis, president of PACT Humane, Downers Grove, IL and an animal attorney with the DePaul University College of Law in Chicago. Obviously since the problem (of stray and feral cats) has only grown worse, this 'solution' has not worked. By not spending the limited resources of animal control and the cost of euthanasia, it's a savings. Also, rabies tags (for the cats which are trapped, neutered and returned) delivers some revenue (to local government). The community is also more receptive (to TNR). Even when there are nuisance calls about stray and feral cats, most people in the community don't want them killed.

So, historically, nothing is done. TNR is certainly more effective than nothing."

TNR began in the UK and in Denmark was imported to the U.S. in the late 1960's, according to Becky Robinson, president of Alley Cat Allies – a not-for-profit national group based in Washington D.C. which supports TNR caretakers and communities seeking to deal with stray and feral cats using TNR. The TNR approach didn't really take off until the 1990's as researchers learned the concept really does work to help reduce numbers, sometimes quite dramatically, but often more gradually.

Kortis is the first to admit that strays and ferals are a problem. Cats spray and yowl and have cat fights in the night. And there's the possibility to spreading rabies, a serious public health risk.

"The yowling, fighting and spraying is greatly related to mating," says Meg Martino of the Chicago Stray Cat Coalition. "Spay/neuter makes a lot of these problems go away. And all are also vaccinated against rabies."

However, the biggest complaint of all is that stray and feral cats kill songbirds and other wildlife.

"I'm not denying that cats kill occasional birds, squirrels, whatever they can catch – we know that's true," adds Martino. "But if they're spayed/neutered, they generally stay closer to where their caretaker is. And they're also simply not as hungry and not as motivated to go after difficult to kill prey."

"TNR is the only choice I've seen that makes sense," adds Dave DeFuniak, executive director of Tree House Animal Foundation, cat-only shelter in Chicago. "No community has animal control resources to keep up with cat reproduction."

When animal control removes some cats from a colony (they're rarely able to catch them all), a vacuum in the colony is created. The cats magically and rapidly have larger litters to fill the void. "There's no way to stay ahead of that," DeFuniak says.

"When communities like Chicago and New York participate in TNR, my hope is that others all over the nation, and even animal control officers will understand that this is our best solution for achieving a mutual goal," says

Robinson.

David Dinger, vice president operations of the Anti Cruelty Society of Chicago is elated about how TNR is overall making a difference across the country, "Millions of cats are out there," he says. "If we do nothing, there will be millions more. Euthanizing as we've traditionally done just doesn't work. I'm optimistic that TNR is a solution not only for outdoor cats but also to limit the numbers of kittens which pour into shelters."

Should all communities support TNR? All the experts interviewed here cheer, a resounding "Yes!"
