OCBP Question-of-the-Week for The Worcester County Times

This Week's Question: What are you doing with those flags? The surf rescue technician's (lifeguard's) flags serve two purposes. First, they are used in one of the three communications methods that the beach patrol uses to communicate among themselves. This form of communications is called semaphore. Semaphore is a type of communication by which a person signals with two hand flags, moving his arms through various positions to represent letters, numerals and special signs. Semaphore is also used by the Scouts, Navy and Coast Guard to communicate over long distances (as long as you can see the other person). Although this method has been around for a long time, a major benefit to the beach patrol is that in an emergency or when a lifeguard is in the water, they do not need any electronics or technology to immediately update and communicate with each other. The majority of messages being sent between lifeguards are communications about lost and found individuals and potential dangers.

Example:LB N ADAM A ATE RED

Lost Boy Name Adam Age eight bathing suit color red

Above is an example of one type of a message that SRTs send between adjoining stands. This information is also transmitted by radio to the Town's communications center (911 center) for broadcast to other agencies and departments throughout Ocean City.

Note: We respond to approximately 2,000 cases of lost and found individuals in a typical season with a 100 percent return rate. To learn more about semaphore, visit the beach patrol website, www.ococean.com/ocbp ; click on the semaphore alphabet link under employee links. The other two communication methods used by the beach patrol are a whistle system and two-way radios.

The second use of the flags is to direct beach patrons out of harms way. Although we do not expect any of our beach patrons to understand this signaling system, we also use the flags to indicate and point to our visitors. The SRT may point at you and direct you to move in a particular direction or to stop an activity such as ball playing in the water. This gentle signaling may be all it takes to warn and move you out of potential danger, such as rip currents, dangerous shorebreak or even marine life such as we see with whale sightings. So remember, when an SRT whistles and points, locate them and make sure they are not trying to tell you something.

Interesting note: The popular peace sign is really the combination of two semaphore letters N and D and stands for Nuclear Disarmament.

Meet the Lifeguard: Crew Chief Travis Sevier

The lifeguard's of the Ocean City Beach Patrol are glad to answer any of your beach and water safety questions. Travis Sevier has been with the Beach Patrol for 6 years. He is the Crew Chief for Crew 7 and sits the stand at 39th Street. His crew covers 35th – 43rd Street. He is an active member of the USLA and the OCBP Dive Team. For recreation Travis likes to compete in triathlons, half marathons, read, and play X-box. He recently graduated from Salisbury University and plans on taking a year off and moving to Australia for six months.
